

Version Tracker

Pricing

Press kit · version-tracker.app · Updated August 2026

Version Tracker tracks software updates across 48 package sources on macOS — Homebrew, MacPorts, the App Store, npm, and more — from a single dashboard, with built-in CVE and macOS Security Advisory (SOFA) vulnerability tracking. No sign-up, no telemetry, 100% local.

Subscription

Plan	Price	Macs	Includes
Free	€0 · forever	—	Scan all 48 sources, comprehensive dashboard, one-time 7-day trial of Solo, support via GitHub after the trial
Mono	€19.90 / year*†	1	One-click updates, CVE/SOFA security intelligence, scheduled scans, email & GitHub support
